steer CLINICAL TAKEAWAY

Why weight regain happens

What happens when you stop GLP-1 treatment? Let's look at the landmark STEP 1 trial extension.

steerclub.com

Doctor-led. Calibrated for Indian biology.

Two-thirds of weight returned

One year after stopping medication, participants regained roughly two-thirds of their lost weight.

WHY IT MATTERS FOR YOU

Metabolic changes are biological, not personal willpower failures.
Steer doctors build sustainable nutrition and muscle-preserving routines.

It's biology, not willpower

The body actively defends fat stores through elevated hunger hormones. Weight regain is not a personal weakness.
